Foam Insert For Polycarbonate Mirrors

*"DuraVision™
Cell Observation
Mirrors provide
safe and reliable
viewing..."*

The use of Foam Inserts increases the life of the mirror in high risk areas by filling the cavity behind polycarbonate mirrors. The Insert is made of high density foam and is sealed to ensure that the integrity of the paint, mirror or polycarbonate are not compromised.

It is crucial that the insert and mirror face be able to move independently to ensure that the polycarbonate can still flex slightly whilst preventing significant mirror face depression.

*"Unique tamper
proof frame is
virtually ligature
free ..."*

Part Number	Size	Description
21191	450mm (18")	450mm (18") Dome Foam Insert
21192	600mm (24")	600mm (24") Dome Foam Insert
21193	450x225mm (18x9")	450mm (18") Half Dome Foam Insert
21194	600x300mm (24x12")	600mm (24") Half Dome Foam Insert
